EXPERIENCE

Lager Logger | [Repo](#)

Full Stack Developer

New York, NY

08/2017 – 10/2017

- Worked with a client and UX design team to create an in-house application prototype for keeping track of the beer sales in NY and California.
- Established hierarchy to prevent sellers from seeing each other's sales and notes while giving admins access to every employee and account on the database.
- As Project lead, provided directions and guidance on how to approach the development of the project on a team of 5.
- Technologies used: React, Express, PostgreSQL

GENERAL ASSEMBLY: WEB DEVELOPMENT IMMERSIVE

Web Developer

New York, NY

05/2017 – 09/2017

- Achieved 650 hours of full stack application development.
- Created multiple full stack projects utilizing a variety of languages/technologies that are listed in the projects section.

Projects

[Blick Art Store](#) | [Repo](#)

- Collaborated with the UX designers to recreate the Dick Blick Art Supply store in order to create a better UI.
- Created the database for items in the store and filtered based on the product categories and sub categories.
- Technologies used: Express, EJS, PostgreSQL

[Link GA](#) | [Repo](#)

- Built a full-stack web application, following the Model-View-Controller pattern, which acts as a social media interface for members of General Assembly.
- Served as the lead back-end developer on a team of 4, and provided front-end support when required.
- Technologies used: React, Node.js Express, Heroku, PostgreSQL.

Fosho App

Front-End Intern

New York, NY

08/2016 – 12/2016

- Developed the website with HTML5, CSS3, Express, and MongoDB.
- Improved features to provide a more sophisticated User experience using ReactJS.
- Performed testing using Mocha, Supertest, and ExpectJS libraries.
- Helped on the QA for the upcoming application by writing User cases and scenarios.
